Purpose of Contact: LLM Cargo Container at 964 yard.

Discussion:

I contacted Mr. Hindman this afternoon to inform him of the discovery of a cargo container of Low-Level Mixed Waste at the 964 yard. The 964 yard is not a RCRA nor CERCLA Hazardous Waste management area. This cargo contains glovebox(es) with leaded gloves (RCRA Hazardous Waste D008). This cargo was inadvertently relocated from the 779 Pad approximately one week ago simply due to some miscommunications. Mr. Hindman and I discussed resolution of this situation as follows:

- 1) Inspect the cargo container today for labels and integrity;
- 2) Inspect the cargo container during the next scheduled 779 Pad inspection (next Wednesday);
- 3) Document inspection in on the 779 Pad inspection log, comments section;
- 4) Move the cargo container to a CERCLA Hazardous Waste management area or RCRA Permitted unit in a timely fashion.

I informed Mr. Hindman that 776/777 project personnel plan on moving the cargo container back to the 779 Pad within the next two weeks.
